

Investment Associate - Sydney

- Are you passionate about financing clean energy?
- Expand your skills in this evolving, fast paced sector
- Newly created role to join a growing team

The Clean Energy Finance Corporation invests, applying commercial rigour, to increase the flow of finance into the clean energy sector.

We do this through an investment strategy focused on cleaner power solutions, including large and small-scale solar, wind and bioenergy; and a better built environment, with investments to drive more energy efficient property, vehicles, infrastructure, and industry.

The CEFC also invests with co-financiers to develop new sources of capital for the clean energy sector, including climate bonds, equity funds, aggregation facilities and other financial solutions.

ABOUT YOUR NEW ROLE

As a key member of our Origination and Transactions team, you will play an important role in supporting quality investment and deployment of CEFC capital. This will involve a mix of qualitative and quantitative tasks providing end-to-end support through the transaction cycle, including:

- Undertaking stakeholder, industry and technology research and analysis
- Contributing to initial screening of opportunities, preparation of investment approval papers, transaction and execution documentation
- Conducting comprehensive transaction modelling, analysis and due diligence
- Working with internal and external stakeholders in modelling financial outcomes of transactions including cash flow forecasts, customised debt schedules and performing sensitivity analysis using existing models or developing bespoke models
- Assisting with structuring and negotiation of terms and engagement with legal and due diligence providers

ABOUT YOU

You have at least 2 years' post-tertiary experience in an investment bank, institutional bank, project finance lender or advisor, and you're ready to expand your skills. With tertiary qualifications in finance, commerce, engineering, or a related field, you can demonstrate:

- Well-developed commercial acumen and insight
- A strong working knowledge of accounting and financing concepts (including debt and equity)
- Advanced Excel financial modelling skills – experience building and auditing models, running sensitivity analysis and knowledge of good model design principles
- Advanced interpersonal and communication skills, including written and verbal skills
- An ability to work within a team environment or autonomously.
- An interest in energy efficiency concepts, clean energy technology, energy markets and/or innovative finance solutions would be advantageous

TO JOIN US

Email your application to careers@cefc.com.au or phone Shonna Lelliott on 07 3188 1672 for more information.

The CEFC is an equal opportunity employer and Indigenous Australian candidates are encouraged to apply.

The successful candidate must have current Australian work rights and will be required to obtain Australian Government security clearance.

Only direct applications will be accepted.
